Reasons for Allowance

2. Applicant's amendment/argument (pages 17-20), filed on July 22, 2009 has been fully considered and are persuasive. As a result of arguments/remarks the art rejection of claims 1, 3-6, 9, 11-18, 21, 25, 26, 29, 33, 38, 41-63 and 65-76 have been withdrawn. Therefore, claims 1, 3-6, 9, 11-18, 21, 25, 26, 29, 33, 38, 41-63 and 65-76 are allowable.

3. The following is an examiner's statement of reasons for allowance.

The prior art of record fails to teach or suggest fusion of multiple imaging planes for isotropic imaging in MRI and quantitative image analysis using isotropic or near-isotropic imaging comprises (a) extracting boundary image data of the body part from each of the first and second image data volumes and combining the extracted boundary image data to form a resultant boundary data volume of the body part in combination into other features and elements of claim 1; (b) extracting boundary image data of the body part from each of the first and second image data volumes and combining the extracted boundary image data to form a resultant boundary data volume of the body part and using the resultant boundary data volume of the body part to electronically derive an implant shape in combination into other features and elements of claims 11 and 67; (c) extracting boundary image data of the body part from each of the image

data volumes, combining the extracted boundary image data from each of the image data volumes to form a resultant image data volume of the body part and deriving a therapy for the body using the resultant data volume in combination into other features and elements of claim 18; (d) extracting boundary image data of the body part from each of the image data volumes, combining the extracted boundary image data from each of the image data volumes to form a resultant image data volume of the body part wherein the resultant image data volume is near-isotropic or isotropic in combination into other features and elements of claim 25; (e) extracting boundary image data of the body part from each of the first and second image data volumes and combining the extracted boundary image data to form a resultant boundary data volume of the body part and selecting a therapy utilizing the three-dimensional shape information in combination into other features and elements of claim 26; (f) extracting boundary image data of the body part from each of the first and second image data volumes and combining the extracted boundary image data to form a resultant boundary data volume of the body part and deriving electronically an implant shape utilizing the three-dimensional shape information in combination into other features and elements of claim 38; (g) extracting boundary image data of the body part from each of the first and second image data volumes and combining the extracted boundary image data to form a resultant boundary data volume of the body part and using the resultant boundary data volume to select an implant shape in combination into other features and elements of claim 52; (h) extracting boundary image data of the body part from each of the first and second image data volumes and combining the extracted boundary image data to

form a resultant boundary data volume of the body part and selecting an implant shape utilizing the three-dimensional shape information in combination into other features and elements of claim 63; (i) extracting boundary image data of the body part from each of the first and second image data volumes and combining the extracted boundary image data to form a resultant boundary data volume of the body part and implanting an implant shape with the selected implant shape in combination into other features and elements of claim 72.

4. Claims 1, 3-6, 9, 11-18, 21, 25, 26, 29, 33, 38, 41-63 and 65-76 (now renumbered 1-55) are allowed.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Relevant Prior Art

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tamez-Pena et al (U. S. 6,984,981 B2) disclose magnetic resonance method and system forming an isotropic, high resolution, three-dimensional diagnostic image of subject from two-dimensional image data scans.

Hoogeveen et al (U. S. 6,479,996 B1) disclose magnetic resonance imaging of several volumes.
